

To provide buses that customers can use safely and comfortably

Tour bus with lift !

Exterior of tour bus with lift

In anticipation of Tokyo hosting the Olympics and Paralympics in 2020, we will promote and implement the barrier-free use of buses in order to make it possible for customers with disabilities to use our vehicles safely.

We are currently introducing vehicles equipped with a central wheelchair lift that can be operated by remote control, thus enabling customers to get on and off while using a wheelchair. They are also equipped with an AED (Automated External Defibrillator) in case of emergencies so that you can relax and enjoy your trip.

At Chiba Chuo Bus, we are aiming to provide buses that customers can use safely and comfortably and will keep on working to improve our services.

Vehicle features

- (1) Seating capacity - 44 people (30 if wheelchair seating is full)
- (2) Spaces for wheelchairs - 6 maximum
- (3) Maximum lifting capacity - Approx. 300 kg
